

Dear Pastor Mark and Immanuel Bible Brothers and Sisters,

We hope this email finds you encouraged as a body of believers in Christ! We are doing well and trying to keep an ongoing balance between our full-time ministry and the small church that Larry is assisting as an Elder and Pulpit fill-in, until we can find a permanent pastor.

In August, we said goodbye to several student families that we sent off to various fields of service to several countries and then we officially began a new semester with another four trainee families. Larry is training maintenance on helicopters to these new pilot/mechanics who will soon be serving at our existing flight programs to speed the gospel message to remote places in East Asia and Brazil!! ☺

They keep getting younger and younger or maybe it's us getting older! ☺

This represents starting over with new names, in relating and reaching out to these energetic couples with their respective personalities, abilities, attitudes and maturity levels, but of course, with a keen desire to learn. ☺ It is actually thrilling and motivating to see the Lord bring more laborers with enthusiasm to carry out the "Great Commission" of church planting abroad. I am so very proud of them and am very thankful for their work ethic and good attitudes.

Larry is the maintenance supervisor and overseeing a total 4400 overhaul project on an R44 helicopter with these young students. This repair project will enable these young pilot/mechanics to grasp the overall total function and make up of this rotorcraft. Larry is

specifically asking prayer for wisdom in communicating effectively what goes into the completion of this tremendous endeavor.

Larry is also upgrading an old Cessna 206 trainer instrument panel to a Glass panel so that those transitioning to the larger turbine Kodiak will not encounter difficulty when learning the newer instrumentation. It starts by taking all of the old instruments out:

Making a new panel and cutting out all the openings for the glass instruments and backup equipment. Larry is also painting blades for an R66 helicopter and prepping this rotorcraft to be shipped in a container to the Philippines to help another mission who facilitate our organization, as well.

We want to say a big **THANK YOU**, for your love offering and sacrifices unto the Lord in supporting us, not only financially, but through your faithful prayers. Your faithfulness and giving empowers us to continually put forth excellent effort towards the Lord's work and allows both of us to perform the ministry and tasks asked of us by the leadership of Ethnos360 Aviation. Thank you, Pastor Mark and Immanuel Bible body for making a difference there in Saginaw, for

teaching the Word, reaching out and touching lives, which is having a ripple affect even when you might feel otherwise. May God continue to bless and use you mightily as you seek to follow the Spirit's leading. We love each of you in the Lord and pray often for your needs, as well.

This is a most recent Photo of our family above. (Austin, Larry, Kim & Alicia). Then below of Kim and Larry enjoying some of God's breathtaking Creation last Saturday.

Prayer Requests:

- Strength to reflect the Lord's grace to those we serve.
- Pray for our Kids: Alicia and Austin that they would seek the Lord and His righteousness. That the Enemy would not touch them. That evil will be overcome with God's love and grace.
- For wisdom and direction in R44 Overhaul.
- Pray that God would give us joy where we serve!
- For the Pilots and Mechanics on the foreign fields flying and maintaining aircraft. Weather, decisions, outreach, church plants, new believers, teaching literacy, teaching the Word, health, strength and safety.
- For Kim as she manages 12 trailers and guest housing. Strength, that God would take away back pain issues, and for input into the lives of our students.
- For Kim as she assists with Kid's Club at our church to about 25 kids.

Serving together in the work of the Lord!

In Christ alone,

Kim and Larry
